

Winnie Chee is a Professor with the Division of Nutrition and Dietetics, International Medical University, Malaysia. Her PhD research was on the effects of milk supplementation and bone health among postmenopausal women. She also did a post-doctoral fellowship in Switzerland on bone and joint health. She has secured research grants and published in high impact journals about calcium, vitamin D, functional food and bone health in children and adults. She was also a member of the expert panel for development of CPG for Osteoporosis in Malaysia (2014). She authored the calcium and magnesium requirements for the revised Recommended Nutrient Intakes (RNI) Malaysia (2017). She is currently the President of the Malaysian Dietitians' Association (MDA) and a prominent speaker in local and international conferences; she was the recipient of the 2015 Wimpfheimer-Guggenheim International Lecture Award by the Academy of Nutrition & Dietetics, USA. Prof Winnie is also a practising dietitian in IMU Medical Clinic.
